Effective May 1, 2022

Data Pro Accounting Software provides a wide range of utilities, scripts and additional modules that are designed to work with the various **Infinity COMMERCE** applications, such as **DP/AUTO** and **DP/DashBoard/CRM**. The number of options that can be developed over time to streamline the automation of a company's business is virtually endless. Call **Data Pro Sales** at **800-237-6377** or e-mail to dpasales@dpro.com with any questions or orders! All scripts and options are purchased separately and require at least one hour of **Technical Support** time for installation, customization and implementation, per utility. Depending on your network and/or e-mail server configuration, additional time could be required for proper implementation and configuration. Some scripts should be modified to include items such as your company's logos and custom designs. These services are additional and billable by the hour by the Data Pro Technical Support Staff.

ADD-ON PRODUCTS

	Part Number	Price	Product Maintenance
<i>(Add-On Scripts for DP/AUTO Event Triggering System)</i>
