

POWERSuite enterprise

Note: All pricing in US Dollars

Effective: May 1, 2022

POWERSuite Enterprise is a special combination of **Data Pro Accounting Software's Infinity POWER** advanced accounting modules combined with our latest **E-commerce** technologies and **CRM** features. This bundle allows companies of all sizes to consolidate all of their business accounting needs into one affordable, yet powerful multi-user, double entry accounting system. From 2 users to 200 users, 1 company to 100 companies, the software comes with full consolidation capabilities for advanced reporting for partnerships and owners with multiple financial holdings.

There's no **"dinging"** you for every employee you add to Payroll. Whether you have 5 employees or 500, they're all included at the same price of the **POWERSuite Enterprise**. The only variations in pricing are the total number of **Windows Users** you want to access your PC/Server simultaneously. You decide whether you're going to host the software yourself or whether you want to put it on a shared third-party Cloud Server. Better yet, you can have it hosted by us on one of our dedicated **DPROCloud Windows Servers** just for you. You don't ever share a server with anyone and it's backed up on the hour with the data retained for a rolling fourteen days. That's how you protect yourself from ransomware attacks!

Pay monthly as you go or prepay annually and save. Your choice!

Monthly

Item # 894	Monthly POWERSuite Enterprise (1 User)	\$119
Item # 897	Monthly POWERSuite Additional User	\$12
Item # 898	Initial Setup Fee (One Time Fee)	\$495

ONE-TIME SETUP FEE DETAILS

- The One-Time Setup Fee is “Required” on either a local installation of POWERSuite Enterprise or on a dedicated cloud server.
- The fee includes all installation of the various software modules and configuration of the **Microsoft IIS Server**, which is required for installation.
- The fee includes the configuration of the **Advanced Security Administrator** module and the **POWERServer**, which are part of the **System Administrator** module.
- The **Customer** will complete a questionnaire first providing the list of users, printers, passwords and security rights that are to be assigned to various users and groups of users to be defined within the accounting software. This will then be predefined for the **Customer** as part of the **One Time Setup Fee**.
- The software requires **Windows (11, 10, 8, or 7)** or a **Windows Server (2022, 2019, 2016 or 2012)**, **512MB RAM Memory** and **500 MB** of disk space.
- **Internet Access is Required!** Administrator Rights of the PC/Server are **Required**.
- The fee includes a **FREE Merchant Processing Account** so that the firm may process “Credit Cards” through the **Accounts Receivable, Sales Order Entry, Point of Sale, and DP/DashBoard/CRM** software modules. An ability to accept **ACH Drafts** is also available for interested companies at no additional charge.
- The fee includes a default **Chart of Accounts** and **Financial Statement** formats that are designed to be completely integrated with all included software modules.
- The fee includes **DP/CONVERT** which is an advanced “Data Conversion” tool which allows companies to “export” their data from virtually any other accounting software product into an “Excel” file template. The **DP/CONVERT “Templates”** guide the user on what pieces of information are “Mandatory” and “Optional” for data conversion. Additional technical support services can be provided to those firms not familiar with data conversion processes.
- Windows Users may be added or deleted by the end of each month for monthly billing customers.
- The number of “Web Browser Users” for **DP/DashBoard/CRM** is unlimited.

TECHNICAL SUPPORT SERVICES

- **1-Hour (\$135) & 4-Hour (\$495)** Technical Support Contracts
- On-Site Training Services - **\$150** per hour (*Corporate Trainer*) **\$200** per hour (*Senior Trainer*), plus Travel Expenses
- Web-Based Training Services - **\$150** per hour (*Corporate Trainer*) **\$200** per hour (*Senior Trainer*) (Up to four client attendees per web session)
- Custom Forms Modifications (*Minimum Price*) (Standard – Checks, Invoices, Statements) **\$200.00** per form modification

WEB IMPLEMENTATION SERVICES

- **DP/AUTO Scripts** - **\$250** per hour (*VB Script Modifications*)
- **DP/DashBoard & DP/API Custom Programming** - **\$400** per hour (*Customizations*)
