

Integrates with the DP/AUTO Event Triggering System and the Payroll and Check Reconciliation Modules!

MODULE OVERVIEW

SYSTEM OVERVIEW

Data Pro Accounting Software's "Direct Deposit Payroll Notification Script" is a perfect "add-on" for all Infinity POWER users with the Payroll module. Instead of having to use expensive third party services or tying up your staff with excessive work for copying, scanning and mailing out copies of each Employee's "Direct Deposit" pay stubs during each and every Payroll cycle, this unique "script" automatically runs in the background and generates an "e-mail" to your Employees with their current Pay Cycle information automatically!

PASSWORD PROTECTED

Plus, each e-mail can be password protected by one of two methods! You have the option of defining a "password" and "e-mail address" user defined field on the PR01 Employee Master Record, and entering each employee's unique password on their profile. Or, you can allow the system to automatically assign the last four (4) digits of the Employee's Social Security Number as the password to the PDF file that is created for them.

The e-mail address you enter on their record most likely is a "personal" e-mail (such as G-mail or Yahoo) so that even IT staff for your company can't see their Payroll records.

This way, the pay stub that is sent to them in a PDF file format is "password protected" from any unwanted intrusions along the way!

Better yet, once completed, the "script" sends your Payroll accounting manager an e-mail with a complete listing of who got their Payroll data sent to them and when it went out to them for confirmation.

REQUIRES THE DP/AUTO EVENT TRIGGERING SYSTEM

This advanced utility is designed to function in dozens of ways that help management better automate their business functions on a daily basis. This special utility is directly linked to your accounting data files using the core POWERServer module which is automatically included in every System Administrator module. It is the heart of all of Data Pro's INFINITY COMMERCE technology! DP/AUTO (Part # 450) is sold separately from the "Add-On" products that are currently available.

MODULES REQUIRED

The requirements for using the Pay Stub DP/AUTO script is the Infinity POWER Payroll and Check Reconciliation modules. The script is designed to work with the Payroll "Direct Deposit" feature. The Payroll module does allow you to print both "paper checks" and generate "Direct Deposit" electronic transactions during the same check run.

This is defined on an "employee by employee" basis on their Master Employee record. You do have to have the ability to upload a Direct Deposit file to your bank with an ACH file.

The screen below illustrates a sample of the e-mail that can get sent to managers in the Payroll department on each Payroll Cycle to notify them who got a Direct Deposit check and pay stub:

Payroll Pay Stub Report for 03/11/24 - tnc

Employee #	Employee Name	Check #	Date
har-102	Jane Lynn Harrison	525299	03/11/2024

Each pay stub form can be customized to your company's unique needs!
