

MODULE OVERVIEW

**SYSTEM OVERVIEW**

The **ADP Integration to General Ledger Script (Part #5540)** is an **"Add-On Product"** available directly from **Data Pro Accounting Software** to be implemented through the **DP/AUTO (Part #450)** module, which is **REQUIRED** for implementation.

The use of **DP/AUTO** and this unique script creates an interface between **Data Pro Accounting Software's Infinity POWER General Ledger** module (**Part #101**) and the **ADP** payroll service.

The result is a seamless interface that allows the **"importing"** of general ledger transaction activity after each payroll cycle has been processed in the **ADP** payroll service.

**E-mail Notifications**

The **ADP Payroll Integration** script for **DP/AUTO** is designed to notify you that there is an import file available of the **"general ledger"** transactions whenever there is a **"payroll cycle"** posted in **ADP**.

The script will e-mail you a detailed report of the transactions that are ready to be posted. You can then execute the **General Ledger** option **"Post Integration Files,"** which manually posts the transactions to your **General Ledger**.

When this information is posted through the script, it is designed to be configured to notify a single user, or group of users, when this information has been posted to the **Infinity POWER General Ledger**.

The script supports the import from either an **"Excel file"** or a **"comma delimited text file."** The **"ADP Integration to General Ledger"** script for **DP/AUTO** is designed to translate an export file from the **ADP Payroll** system into an integration file which can be posted in **Infinity POWER General Ledger** module.

The script is setup and configured within **DP/AUTO** module and is normally scheduled to run periodically during the day checking in a folder as specified in the script.

The script will retrieve all of the General Ledger transactions from the **ADP** export file, reformat the transactions into the proper format, and append the transactions to the **Infinity POWER General Ledger's Payroll** Integration file.

It is up to you how often the General Ledger Integration files should be posted.

This can be done throughout the day, end of the day or weekly.

*Integrates with the DP/AUTO Event Triggering System and the Infinity POWER Payroll Module!*
